

# WHY YOU SHOULD NOT BUY FROM AN UNLICENSED CONTRACTOR

Here are some things you should consider  
before you buy from an  
**UNLICENSED HVAC CONTRACTOR!**

- ⇒ The Equipment Manufacturer probably will **NOT WARRANTY** the equipment if there is a problem.
- ⇒ The contractor may **not be trained** by the manufacturer to install that type of sophisticated, computerized equipment
- ⇒ He probably is **not competent to design** the proper system for your home.
- ⇒ If there is an insurance claim, the **insurance company may not cover it**
- ⇒ He may **not be in business tomorrow** to stand behind his work.
- ⇒ He probably does not have workers' comp- **What if he gets hurt at YOUR home? YOU are liable!**
- ⇒ He may not pay his bills and **your property could be liened**
- ⇒ He probably has not gotten **Continuing Education** and is not up on current codes, laws and mfgers' installation instructions
- ⇒ He probably has not gotten the **proper permits**

*If he were doing all of these things,  
why wouldn't he be licensed?*

**Do you really want  
to risk it?**
